Epic Table
by GamFratesi

GUBI & GamFratesi

Danish-Italian design duo GamFratesi have been working with GUBI since the inception of their studio and, with their own dual heritage, share GUBI's ability to synthesize seemingly opposing ideas – the classic and the contemporary, the intellectual and the eclectic, the understated and the expressive, the manufactured and the unique. Constantly challenging the status quo while respecting what has gone before gives their collaborations an evolutionary quality that form the foundation of their relationship.

The Epic Table

Named after the epic poems of ancient times, GamFratesi's Epic Table for GUBI is a sculptural piece of furniture inspired by Greek columns and Roman architecture.

Made in Italy from travertine stone, the monolithic form emphasizes the materiality of the stone, the natural beauty of its veins, and the vibrant texture of its unique patina – in which a new detail can be discovered with every use.

The Epic Table

Trendsetting

Having been at the forefront of the current trend for marble, GUBI now introduces its first travertine stone piece in celebration of this natural material.

The Epic Table

Sculptural

The Epic Table has a strong, sculptural form comprising two simple shapes – a hexagon and a circle – that references classical architecture and yet creates a new expression.

The Epic Table

Characteristic

Emphasizing the stone's natural open texture, the veins and striations make each piece unique.

The Epic Table

Versatile

The Epic Table can stand alone as a sculptural form or be combined in dynamic clusters.

The Epic Table

Exclusive Color Scheme

A color palette of Neutral White, Vibrant Gray or Burnt Red enables the impact of the piece to be dialed up or down to suit the interior space.
